

Quality. Precision. Craftsmanship.

Who We Are

National leader in parts manufacturing fabricating precision parts for any market sector

Headquartered in eastern Washington State since 1998, we are a national leader in advanced machining and fabrication. From single item orders to a production run of several thousand, Precision Cutting Technologies (PCT) delivers a complete manufacturing solution for parts of any construction material.

We fabricate precision parts for any market sector and produce custom components from customer design to product delivery.

- 1 Customer Centric**
Customers are at the center of everything we do – we stand behind our work and guarantee customer satisfaction
- 2 Complete Manufacturing Solution**
Our craftsmen manufacture the highest quality end items made of any industrial material from design to product delivery
- 3 Partners with Integrity**
Honest and truthful in what we say and do, we prioritize integrity above all else

Our Services

Laser Cutting

Waterjet Cutting

CNC Punching & Forming

Metal Finishing

Welding & Fabrication

CNC Machining

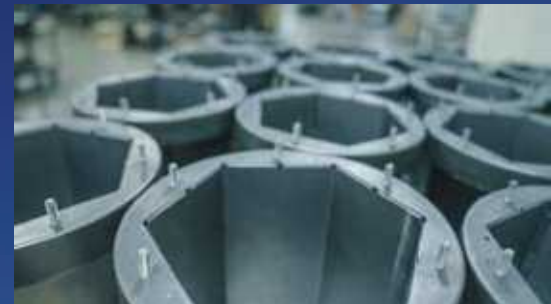

Powder Coat

Hardware & Assembly

Precision Parts

Aluminum

Stainless Steel

Mild Steel

Our Employees

4

Laser & Waterjet Operators

Our expert craftsmen employ state-of-the-art technology to precisely cut parts to your exact specification

22

Shop Fabricators

We produce best-in-class precision parts for commercial and industrial uses

3

Powder Coaters

Our powder coating and metal furnishing professionals provide a high-quality finish for a more polished and durable product

5

Project Managers

We have 15 years of experience as subject matter experts to forecast on-time and under-budget projects
